Summary

I am a Frontend Web Developer with over three years of professional experience. I specialize in creating responsive, interactive, and user-focused web applications using modern technologies such as React JS or Next JS. I have a proven track record of collaborating effectively with UI/UX designers and backend developers to deliver seamless and high-quality user experiences. Passionate about continuous learning, I actively engage in personal projects and stay updated with the latest industry trends to enhance my skills and contribute to innovative solutions.

Education

IPB University   Sep 2018 - March 2023

Fresh Graduate, Computer Science

Work Experiences

Frontend Developer at Inkor   Aug 2024 - Present

- During my role, I developed user-facing features using React JS, built reusable components and frontend libraries, and optimized performance across various devices and browsers. I collaborated with team members and stakeholders to design and implement new features, participated in debugged and resolved issues as they arose.

Frontend Developer at Dealjava   March 2023 - Jul 2024

- Developed a Point of Sales (POS) system from scratch with React JS and Chakra UI, implementing key features and ensuring system reliability.
- Integrated various APIs to enhance the functionality of the POS system.
- Implements WebSocket functionality, ensuring efficient real-time communication between client and server for data updates without the need to refresh the page.
- Designed and implemented new features to improve user experience and streamline business processes.
- Collaborated closely with UI/UX designers to create visually appealing and user-friendly interfaces.
- Worked with backend developers to integrate frontend elements with server-side logic.
- Built offline features for the POS system using Dexie.js to store API data locally and GraphQL for synchronization.
- Conducted thorough testing to identify and fix bugs, ensuring a smooth and reliable user experience.
- Delivered responsive and cross-browser compatible web applications to ensure accessibility on all devices.
- Provided ongoing maintenance and updates to the POS system to address user feedback and improve functionality.

Frontend Developer Intern at DSITD IPB   Jan 2023 - March 2023

- Responsible for reengineering the SITI website using ASP .NET MVC and Bootstrap.
- Collaborated with the UI/UX design team and backend team to create optimal website.
- Integrated APIs to enhance the system's capabilities and streamline operations.
- Deliver responsive and cross-browser friendly websites.

Frontend Developer Intern at DSITD IPB   Feb 2022 - Jul 2022

- Responsible for developing specific features on the Digitani web project, namely Konsultani and Tanya Pakar using framework Laravel and Bootstrap.
- Collaborated with the UI/UX design team and backend team to create optimal features.
- Integrated multiple third-party APIs to enhance system functionality and ensure seamless data exchange.
- Delivers features that are responsive and cross-browser friendly.
- Implemented progressive web apps (PWA) for the Konsultani and Tanya Pakar features.
- Conducted testing and fixed bugs on the Konsultani and Tanya Pakar features.
